

Volvo

Vehicles:

XC 70

NOTES:

Attach straps 1, 2, 3 & 4 first to the baby seat hooks located in the bottom of the rear seats while the seats are folded down (see owners manual). Do not tighten these all the way. This will require some fine tuning as you put the seats up it will pull down and tighten these straps. Loosen or tighten straps as needed and make sure the SAB in the locked position is secure and just touches the rear seats when they lock in the upright position. Now attach straps 4 & 5 to the D – rings in the floor corners at the hatch end. Tighten both ends of unit and adjust toward seat until the hatch closes easily.
